

Flu Vaccinations 50 - 64 year olds.

As reported in the press we have been instructed that all patients aged 50 - 64 will be eligible for a free NHS flu vaccination from 1st December. Please note this includes anyone who will turn 50 before 31/3/21.

Having already delivered over 2,500 vaccinations this Autumn to our 'at risk' and over 65 patients, we have developed a quick, safe and COVID secure vaccination programme at the surgery.

We will have clinics on the following dates and would be delighted to welcome anyone within this new cohort to make a booking:

- Saturday 5th December
- Saturday 12th December
- Wednesday 9th December
- Wednesday 16th December

Please call 01275 332420 (Monday-Friday 8am-6pm) to do this.

If you have been advised to self-isolate, or if you have a new cough, fever (greater than 37.8), change or loss of your sense of taste or smell then please do not attend your flu vaccination, or any other appointment, and self-isolate as per Government advice.

Unfortunately, the NHS will not guarantee stock to cover all of this cohort of people. We have ordered as many vaccines as we are able too but this will not be enough to vaccinate everyone. Please prioritise booking an appointment if you would like a vaccination, as it is not guaranteed that we will receive any further immunisations after this point.

With best wishes
