

Managing Lead Practice Nurse

Chew Medical Practice (Bath & North East Somerset, Swindon & Wiltshire Integrated Care Board)

24 - 27 hours (3 days)

Salary by negotiation

Chew Medical Practice has an exciting opportunity for an experienced Practice Nurse to lead our team of nurses and healthcare assistants whilst at the same time working as part of the senior management team alongside the Partners.

We are committed to providing accessible, high-quality care to our 10,500 patients, working from a purpose-built surgery situated in the heart of the beautiful Chew Valley. We are conveniently only 13 miles from Bristol and Bath, both of which are easily commutable. We consistently score excellently on patient satisfaction surveys and all clinical indicators (e.g QOF/IIF)

We aim to be at the forefront of modern general practice, offering a wide range of services and facilities conveniently located for most of our patients. As a rural practice, we recognise the importance of local provision, and it is our intention whenever possible to bring opportunities for treatment, awareness and support into our community.

The successful candidate will be clinically involved in all aspects of Primary Care nursing. Experience of chronic disease management, to include diabetes and/or respiratory, would be highly desirable. Alongside line managing the nursing team you would be part of the senior management team supporting the practice management in reviewing and delivery of clinical policies and procedures.

If interested, we would love to hear from you and arrange an informal visit.

For more information please call or email Clare Watkins, HR Officer clare.watkins2@nhs.net 01275 334123 or Dr Ceri Lumb, GP Partner ceri.lumb@nhs.net

To apply, please send a covering letter and CV to Clare.watkins2@nhs.net

Closing date: Friday 12th April
